

BABY ANVI EKHANDI – RIGHT EYE GROUP E RETINOBLASTOMA

Baby Anvi is only a little over a year old and has already shown incredible strength, but her family is in desperate need of support to give her a fighting chance at life. Anvi needs to undergo six chemotherapy sessions, amounting a total of ₹2,86,000. Unfortunately, Anvi's family comes from a very humble background and is unable to afford the exorbitant costs associated with her treatment. Please come forward and provide help for Anvi's treatment of Right Eye Group E Retinoblastoma.

Being Treated At: Centre for Sight, Hyderabad

Age of Child: 18 Months

MEDICAL REPORT

Baby Anvi Ganesh Ekhande
MR number HYBH. 70016
DoB 26-06-2023

Baby Anvi Ganesh Ekhande, 1-year-8-month-old child with Retinoblastoma RE, Group E, status-post superselective triple drug intra-arterial chemotherapy with a combination of Melphalan, Carboplatin and Etoposide X 3 presented for a follow-up evaluation today.

On evaluation, the child showed a paradoxical increase in the size of the tumor compared to post IAC 2, indicating possible chemoresistance. LE continued to be normal. Initiation of standard dose intravenous chemotherapy (IVC) with a combination of Vincristine+Carboplatin+Etoposide under the care of a pediatric oncologist seems to be a reasonable option at this stage. The child underwent chemocryotherapy and IVC X 1, and was advised to return for a follow-up after 4 weeks.
